

Dibyajeet Kirttania

UX/UI Designer

Durgapur, India | +91 9749732887 | ux.dibyajeet@gmail.com | [Portfolio](#) | [LinkedIn](#)

SUMMARY

UX/UI Designer with experience across enterprise SaaS product design and independent, self-directed projects. Focused on understanding the underlying user and business problem before jumping to a solution: research, structure, and interaction design that holds up once real users touch it. Comfortable working closely with product and engineering to take a problem from ambiguity to a shipped, measurable outcome.

SKILLS

Design: User Research, User-Centered Design, Design Thinking, Product Thinking, Interaction Design, Information Architecture, Journey Mapping, User Flows, Wireframing, Prototyping, UI Design, Visual Design, Design Systems, Usability Testing, A/B Testing, MVP Scoping, Stakeholder Management

Front-End Development: HTML, CSS, JavaScript, used to build and ship personal projects end-to-end (see Kanban Board below)

AI-Assisted Workflows: Claude, Claude Design, Figma AI, Google Stitch

Tools: Figma, Adobe XD, Adobe After Effects, Adobe Illustrator, Protopie, Chrome DevTools, Confluence, Jira

EXPERIENCE

Independent UX/UI Designer & Developer

Mar 2025 – Present

Freelance / Self-Directed

- Designed and built a Kanban task board end-to-end from Figma mocks to a working product, including a token-based design system. [View project ↗](#)
- Caught and fixed a legibility problem in the priority system: all priority levels used the same hue at different shades, making low priority nearly invisible. Fixed by moving to a distinct red/amber/gray hierarchy.
- Sequenced the feature roadmap deliberately, with local save and status visibility first, core card actions next, and drag-and-drop last, and chose to integrate an existing library for drag-and-drop rather than build it from scratch, to keep focus on the interaction design.
- Took on freelance graphic design and social media creative for local businesses alongside this build.

Senior Associate UX Designer

Nov 2024 – Mar 2025

Workforce Cloud Tech India (Recruit CRM)

- Individual contributor and owner of all communications-related features inside Recruit CRM, an enterprise recruitment SaaS platform.
- Contributed to the New Design System project, defined system goals and built reusable components in Figma, improving design-to-dev consistency.
- Contributed to MVP scoping and design for early-stage products: Recruit Craft, Candidate Portal, and Recruit Pulse.
- Delivered careers pages for two clients that met expectations with zero revisions.
- Trained two design trainees in design fundamentals and design thinking.

Associate UX Designer

Nov 2023 – Nov 2024

Workforce Cloud Tech India (Recruit CRM)

- Designed the Target Report dashboard feature end-to-end, directly leading to the onboarding of a 100-seat client. [View project ↗](#)
- Designed a phone-calling feature letting users purchase numbers and make calls directly from the platform. [View project ↗](#)
- Improved the automated communication email feature and in-app task management workflows.

FEATURED PROJECTS

- Sync Up: product design exploration focused on collaborative, real-time workflows. [View project ↗](#)

EDUCATION

Bachelor of Design (B.Des), Fashion Communication, NIFT, Kolkata

CGPA: 8.7 | Coursework: design fundamentals, typography, layout, motion graphics, design thinking, branding, and strategic design management.
